

# Safeguarding Taxpayer Data

**A Guide for Your Business**

# The Need to Safeguard Taxpayer Data

**S**afeguarding taxpayer data is a top priority for the IRS. It is the responsibility of government, businesses, organizations, and individuals that receive, maintain, share, transmit, or store taxpayers' personal information. Taxpayer data is defined as any information that is obtained or used in the preparation of a tax return (e.g., income statements, notes taken in a meeting, or recorded conversations). Whether you are paid or unpaid for your services, a one person operation or a large corporation, have one client or thousands, it is critical to protect taxpayer data. Putting safeguards in place helps prevent fraud and identity theft, and enhances customer confidence and trust.

This guide will help non-governmental businesses, organizations, and individuals that handle taxpayer data to understand and meet their responsibility to safeguard this information. IRS *e-file* and paper Return Preparers, Intermediate Service Providers, Software Developers, Electronic Return Originators, Reporting Agents, Transmitters, their affiliates, and service providers can use this guide to determine and meet their data privacy and security needs.

There are a growing number of laws, regulations, standards, and best practices that cover the privacy and security of taxpayer data. This guide references those that provide guidelines on establishing safeguards that help you:

- Preserve the confidentiality and privacy of taxpayer data by restricting access and disclosure;
- Protect the integrity of taxpayer data by preventing improper or unauthorized modification or destruction; and
- Maintain the availability of taxpayer data by providing timely and reliable access and data recovery.

For a brief description of related laws and regulations, refer to the table in Chapter 4, "Safeguarding Taxpayer Data, References to Applicable Laws and Regulations." For references to standards and best practices, refer to the table in Chapter 5, "Safeguarding Taxpayer Data, References to Applicable Standards and Best Practices."

# How to Safeguard Taxpayer Data

## Getting Started

If you handle taxpayer information you may be subject to the Gramm-Leach Bliley Act (GLB Act) and the Federal Trade Commission (FTC) Financial Privacy and Safeguards Rules. Whether or not you are subject to the GLB Act and the FTC Rules, you could benefit from implementing the general processes and best practices outlined in FTC information privacy and safeguards guidelines.

Financial institutions as defined by FTC include professional tax preparers, data processors, their affiliates, and service providers who are significantly engaged in providing financial products or services. They must take the following steps to protect taxpayer information. Other businesses, organizations, and individuals handling taxpayer information should also follow these steps because they represent best practices for all.

- Take responsibility or assign an individual or individuals to be responsible for safeguards;
- Assess the risks to taxpayer information in your office, including your operations, physical environment, computer systems, and employees, if applicable. Make a list of all the locations you keep taxpayer information (computers, filing cabinets, bags, and boxes taxpayers may bring you);
- Write a plan of how you will safeguard taxpayer information. Put appropriate safeguards in place;
- Use only service providers who have policies in place to also maintain an adequate level of information protection defined by the Safeguards Rule; and
- Monitor, evaluate, and adjust your security program as your business or circumstances change.

The FTC has fact sheets and guidelines on privacy and safeguards for businesses on their Web site at [www.ftc.gov](http://www.ftc.gov). In addition, you may seek outside professional help to assess your information security needs.

To safeguard taxpayer information, you must determine the appropriate security controls for your environment based on the size, complexity, nature, and scope of your activities. Security controls are the management, operational, and technical safeguards you may use to protect the confidentiality, integrity, and availability of your customers' information. Examples of security controls are:

1. Locking doors to restrict access to paper or electronic files;
2. Requiring passwords to restrict access to computer files;
3. Encrypting electronically stored taxpayer data;
4. Keeping a backup of electronic data for recovery purposes; and
5. Shredding paper containing taxpayer information before throwing it in the trash.

For additional examples of security controls, refer to the National Institute of Standards and Technology (NIST) SP 800-53 publication listed in Chapter 5.

# Putting Safeguards in Place

The following checklist includes many activities that can be included in an information security program. It can help you put in place security procedures and controls to protect taxpayer information. It is important to consider all the safeguards that are applicable to your business.

## CHECKLIST FOR SAFEGUARDING TAXPAYER DATA

ADMINISTRATIVE ACTIVITIES	ONGOING	DONE	N/A
Complete a Risk Assessment. Identify the risks and potential impacts of unauthorized access, use, disclosure, disruption, modification, or destruction of information and information systems that can be used to access taxpayer data. How vulnerable is your customer's data to theft, disclosure, unauthorized alterations, or unrecoverable loss? What can you do to reduce the impact to your customers and your business in such an event? What can you do to reduce vulnerability?	<input type="checkbox"/>	<input type="checkbox"/>	
Write and follow an Information Security Plan that:	<input type="checkbox"/>	<input type="checkbox"/>	
– Addresses every item identified in the risk assessment.	<input type="checkbox"/>	<input type="checkbox"/>	
– Defines safeguards you want affiliates and service providers to follow.	<input type="checkbox"/>	<input type="checkbox"/>	
– Requires a responsible person to review and approve the Information Security Plan.	<input type="checkbox"/>	<input type="checkbox"/>	
– Requires a responsible person to monitor, revise, and test the Information Security Plan on a periodic (recommended annual) basis to address any system or business changes or problems identified.	<input type="checkbox"/>	<input type="checkbox"/>	
Periodically (recommended annually) perform a Self-Assessment to:	<input type="checkbox"/>	<input type="checkbox"/>	
– Evaluate and test the security plan and other safeguards you have in place.	<input type="checkbox"/>	<input type="checkbox"/>	
– Document information safeguards deficiencies. Create and execute a plan to address them.	<input type="checkbox"/>	<input type="checkbox"/>	
Retain a copy of the Self-Assessment and ensure it is available for any potential reviews.	<input type="checkbox"/>	<input type="checkbox"/>	
If required by the FTC Privacy Rule, provide privacy notices and practices to your customers.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Specify in contracts with service providers the safeguards they must follow and monitor how they handle taxpayer information.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Ask service providers to give you a copy of their written security policy on safeguarding information.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Encrypt files... Destroy expired records... Use information only as authorized... Monitor for breaches... Increase customer confidence and trust... Protect your credibility... Identify risk of breach... Have an information security plan... Lock files and systems... Maintain backups... Encrypt files... Increase customer confidence and trust... Protect your credibility... Identify risk of breach... Use information only as authorized... Monitor for breaches... Increase customer confidence and trust... Have an information security plan... Lock files and systems... Maintain backups... Encrypt files... Increase customer confidence and trust... Protect your credibility... Identify risk of breach... Use information only as authorized... Monitor for breaches... Increase customer confidence and trust... Have an information security plan... Lock files and systems... Maintain backups... Encrypt files... Increase customer confidence and trust... Protect your credibility... Identify risk of breach...

FACILITIES SECURITY	ONGOING	DONE	N/A
Protect from unauthorized access and potential danger (e.g., theft, floods, and tornados) all places where taxpayer information is located.	<input type="checkbox"/>	<input type="checkbox"/>	
Write procedures that prevent unauthorized access and unauthorized processes.	<input type="checkbox"/>	<input type="checkbox"/>	
Assure that taxpayer information, including data on hardware and media, is not left un-secured on desks or photocopiers, in mailboxes, vehicles, trash cans, or rooms in the office or at home where unauthorized access can occur.	<input type="checkbox"/>	<input type="checkbox"/>	
Authorize and control delivery and removal of all taxpayer information, including data on hardware and media.	<input type="checkbox"/>	<input type="checkbox"/>	
Lock doors to file rooms and/or computer rooms.	<input type="checkbox"/>	<input type="checkbox"/>	
Provide secure disposal of taxpayer information, such as shredders, burn boxes, or temporary file areas until it can be securely disposed.	<input type="checkbox"/>	<input type="checkbox"/>	
PERSONNEL SECURITY	ONGOING	DONE	N/A
Create and distribute Rules of Behavior that describe responsibilities and expected behavior regarding computer information systems as well as paper records and usage of taxpayer data. Have all information system users complete, sign, and submit an acknowledgement that they have read, understood, and agree to comply with the rules of behavior.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
An example of rules of behavior can be found in Appendix A of NIST SP-800 18 <i>Guide for Developing Security Plans for Federal Information Systems</i> , February 2006.			
Ensure personnel from third-party providers such as service bureaus, contractors, and other businesses providing information technology services meet the same security requirements as those applied to your personnel.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Address Rules of Behavior for computer system management.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
When interviewing prospective personnel, explain the expected Rules of Behavior.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
When possible, perform a background and/or reference check on new employees who will have contact with taxpayer information. Conduct background screenings that are appropriate to the sensitivity of an assigned position.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Screen personnel prior to granting access to any paper or electronic data. This will help ensure their suitability for a position requiring confidentiality and trust.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Have personnel who will have access to taxpayer information sign nondisclosure agreements on the use of confidential taxpayer information.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Develop and enforce formal compliance policies and processes, including possible disciplinary action, for all personnel who do not comply with the businesses' established information security policies and procedures.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Terminate access to taxpayer information (e.g., login IDs and passwords) for those employees who are terminated or who no longer need access.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
For each employee who is terminated, conduct an exit interview and ensure the employee returns property that allows access to taxpayer information (e.g., laptops, media, keys, identification cards, and building passes).	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Train staff on Rules of Behavior for access, non-disclosure, and safeguards of taxpayer information. Provide refresher training periodically.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

<b>INFORMATION SYSTEMS SECURITY</b>	<b>ONGOING</b>	<b>DONE</b>	<b>N/A</b>
Information systems include both automated and manual systems made up of people, machines, and/or methods for collecting, processing, transmitting, storing, archiving, and distributing data. To help ensure the accuracy, validity, consistency, and reliability of taxpayer data, you should manage taxpayer data information systems based on the guidelines below.			
Grant access to taxpayer information systems only on a valid need-to-know basis that is determined by the individual's role within the business.	<input type="checkbox"/>	<input type="checkbox"/>	
Put in place a written contingency plan to perform critical processing in the event that your business is disrupted. It should include a plan to protect both electronic and paper taxpayer information systems. Identify individuals who will recover and restore the system after disruption or failure.	<input type="checkbox"/>	<input type="checkbox"/>	
Periodically test your contingency plan.	<input type="checkbox"/>	<input type="checkbox"/>	
Back up taxpayer data files regularly (e.g., daily or weekly) and store backup information at a secure location.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Maintain hardware and software as needed and keep maintenance records.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>COMPUTER SYSTEMS SECURITY</b>	<b>ONGOING</b>	<b>DONE</b>	<b>N/A</b>
Identify and authenticate computer system users who require access to electronic taxpayer information systems before granting them access.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
You can manage user identities by:			
–Identifying authorized users of electronic taxpayer information systems and grant specific access rights/privileges.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
–Assigning each user a unique identifier.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
–Verifying the identity of each user.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
–Disabling user identifiers after an organization-defined time period of inactivity.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
–Archiving user identities.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Implement password management procedures that require strong passwords. See the “Stop. Think. Click: Seven Practices for Safer Computing” reference listed in Chapter 5 for information on strong passwords.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Require periodic password changes.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Disable and remove inactive user accounts.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Protect electronic taxpayer information systems connected to the Internet with a barrier device (e.g., firewall, router, or gateway). Any failure of these devices should not result in an unauthorized release of taxpayer data.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
When storing taxpayer information electronically, consider following best practices and store it on separate secure computers or media that are not connected to a network and that are password protected and encrypted.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Encrypt taxpayer information when attached to email.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Encrypt taxpayer information when transmitting across networks.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Regularly update firewall, intrusion detection, anti-spyware, anti-adware, anti-virus software, and security patches.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Monitor computer systems for unauthorized access by reviewing system logs.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

<b>COMPUTER SYSTEMS SECURITY</b> continued	<b>ONGOING</b>	<b>DONE</b>	<b>N/A</b>
Lock out computer system users after three consecutive invalid access attempts.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Remove all taxpayer information once the retention period expires by using software designed to securely remove data from computers and media prior to disposing of hardware or media. The FTC Disposal Rule has information on how to dispose of sensitive data.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
As recommended by the FTC, reduce risks to computer systems by performing vulnerability scans and penetration tests periodically. You can learn more about this at the FTC Web site in their article "FTC Facts for Business – Security Check: Reducing Risks to Your Computer Systems."	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<b>MEDIA SECURITY</b>	<b>ONGOING</b>	<b>DONE</b>	<b>N/A</b>
Store computer disks, removable media, tapes, compact disks, flash drives, audio and video recordings of conversations and meetings with taxpayers, and paper documents in a secure location, cabinet, or container.	<input type="checkbox"/>	<input type="checkbox"/>	
Secure media storage areas, including rooms, cabinets, and computers by locks or key access. Where appropriate, employ an automated mechanism to ensure only authorized access.	<input type="checkbox"/>	<input type="checkbox"/>	
Restrict authorized access to media storage.	<input type="checkbox"/>	<input type="checkbox"/>	
Limit removal of taxpayer information to authorized persons and perform information access audits regularly.	<input type="checkbox"/>	<input type="checkbox"/>	
Securely remove all taxpayer information when disposing of computers, diskettes, magnetic tapes, hard drives, or any other electronic media that contain taxpayer information. The FTC Disposal Rule has information on how to dispose of sensitive data.	<input type="checkbox"/>	<input type="checkbox"/>	
Shred or burn paper documents before discarding them.	<input type="checkbox"/>	<input type="checkbox"/>	
<b>CERTIFYING INFORMATION SYSTEMS FOR USE</b>	<b>ONGOING</b>	<b>DONE</b>	<b>N/A</b>
Determine if risks are acceptable to certify systems for use.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Sign an authority to operate.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
If you use a certified independent certification company, consider the following:	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
– On a periodic (recommended annual) basis, have an independent individual or business with relevant security expertise, evaluate the security plans, controls, and any other safeguards implemented in your business against best practices.	<input type="checkbox"/>	<input type="checkbox"/>	
– Have a report generated from the audit that certifies that your business follows best practices.	<input type="checkbox"/>	<input type="checkbox"/>	
– Ensure the report highlights any deficiencies and provides recommendations for their correction.	<input type="checkbox"/>	<input type="checkbox"/>	
– Develop a plan for your business to correct any deficiencies found and to ensure that the plan is successfully executed.	<input type="checkbox"/>	<input type="checkbox"/>	
– Retain a copy of the audit report to ensure it is available for any potential reviews.	<input type="checkbox"/>	<input type="checkbox"/>	
– Be prepared to show how you mitigate risks.	<input type="checkbox"/>	<input type="checkbox"/>	

# Reporting Incidents

Safeguarding personally identifiable taxpayer information is of critical importance to retaining the confidence and trust of taxpayers. Appropriately handling information security incidents is also very important to retaining the confidence and trust of taxpayers.

An information security incident is an adverse event or threat of an event that can result in an unauthorized disclosure, misuse, modification, or destruction of taxpayer information. If you believe an information security incident has occurred that affects the confidentiality, integrity, or availability of taxpayer data or the ability for the taxpayer to prepare or file a return, you may need to report the incident. The following table includes examples of types of incidents.

INCIDENT TYPE	DESCRIPTION
Theft	Unauthorized removal of computers, data/records on computer media or paper files.
Loss/Accident	Accidental misplacement or loss of computers, data/records on computer media or paper files.
Unauthorized Access	A person or computer gains logical or physical access without permission to a network, system, application, data, or other resource.
Unauthorized Disclosure/ Usage	A person violates disclosure or use policies such as IRC sections 6713 & 7216. See Chapter 4, Laws and Regulations, for information on IRC sections 6713 & 7216.
Computer System/Network Attack	A virus, worm, Trojan horse, or other code-based malicious entity infects a host and causes a problem such as disclosure of sensitive data or denial of services.

The following are recommended actions for incident reporting:

- Individuals (e.g., employees and contractors) who detect a situation that may be an information security incident should immediately inform the individual designated by the business to be responsible for handling customer information security.
- The individual responsible for handling customer information security should gather information about the suspected incident.
- If you believe the incident compromises a person's identity or their personal or financial information, we recommend you refer to the FTC document, *Information Compromise and the Risk of Identity Theft: Guidance for Your Business*. Among other things, this reference will help you determine when to notify local law enforcement, the Federal Bureau of Investigation, the U.S. Secret Service, the U.S. Postal Inspection Service, affected businesses, and customers. See the "Safeguarding Taxpayer Data, References to Applicable Standards and Best Practices" table in Chapter 5 for the Internet link to this FTC document.

# Laws and Regulations

Many federal, state, city, and local government laws and regulations are in place to safeguard taxpayer data.

The following table includes a brief description of some of them and provides references to more detailed information.

## SAFEGUARDING TAXPAYER DATA

### REFERENCES TO APPLICABLE LAWS AND REGULATIONS

#### TYPE: Federal/Privacy and Security

**SUMMARY:** *The Gramm-Leach-Bliley Financial Modernization Act of 1999* – This statute (otherwise known as the Gramm-Leach-Bliley Act) (GLB Act), among other things, directed FTC to establish the Financial Privacy Rule and the Safeguards Rule. More information is available at <http://www.ftc.gov/privacy/privacyinitiatives/glbact.html>.

#### TYPE: Federal/Security

**SUMMARY:** *FTC Standards for Safeguarding Customer Information Rule (16 CFR Part 314)* – This Rule (otherwise known as the Safeguards Rule) requires financial institutions, as defined, which includes **professional tax preparers, data processors, affiliates, and service providers** to ensure the security and confidentiality of customer records and information. It protects against any anticipated threats or hazards to the security or integrity of such records. In addition, it protects against unauthorized access to or use of such records or information which could result in substantial harm or inconvenience to any customer. This Rule requires that financial institutions develop, implement, and maintain an Information Security Program. The plan should be written in one or more accessible parts and contain administrative, technical, and physical safeguards that are appropriate to the business' size and complexity, nature and scope of activities, and sensitivity of customer information handled. The Safeguards Rule is available at <http://www.ftc.gov/privacy/privacyinitiatives/glbact.html>.

*Sarbanes-Oxley Act of 2002 (17 CFR Parts 232, 240 and 249)* – Section 404 requirements apply to all **Securities and Exchange Commission (SEC) reporting companies** with a market capitalization in excess of \$75 million. It requires companies to establish an infrastructure to protect and preserve records and data from destruction, loss, unauthorized alteration, or other misuse. This infrastructure must ensure there is no room for unauthorized alteration of records vital to maintaining the integrity of the business processes. More information is at <http://www.gpoaccess.gov>.

#### TYPE: Federal/Privacy

**SUMMARY:** *FTC Privacy of Consumer Financial Information Rule (16 CFR Part 313)* – This Rule (otherwise known as the Financial Privacy Rule) aims to protect the privacy of the consumer by requiring financial institutions, as defined, which includes **professional tax preparers, data processors, affiliates, and service providers** to give their customers privacy notices that explain the financial institution's information collection and sharing practices. In turn, customers have the right to limit

some sharing of their information. Also, financial institutions and other companies that receive personal financial information from a financial institution may be limited in their ability to use that information. The FTC Privacy Rule implements sections 501 and 502(b)(2) of the GLB Act requirements. The Privacy Rule is available at [http://www.ftc.gov/privacy/privacyinitiatives/financial\\_rule.html](http://www.ftc.gov/privacy/privacyinitiatives/financial_rule.html).

*Title 26: Internal Revenue Code (IRC) § 301.7216.1* – This provision imposes criminal penalties on **any person engaged in the business of preparing or providing services in connection with the preparation of tax returns** who knowingly or recklessly makes unauthorized disclosures or uses of information furnished to them in connection with the preparation of an income tax return. Internal Revenue Code (IRC) § 7216 is available at <http://www.gpoaccess.gov>.

*Title 26: Internal Revenue Code (IRC) § 6713* – This provision imposes monetary penalties on the unauthorized disclosures or uses of taxpayer information by **any person engaged in the business of preparing or providing services in connection with the preparation of tax returns**. Internal Revenue Code (IRC) § 6713 is available at <http://www.gpoaccess.gov>.

*Internal Revenue Procedure 2005-60* – This procedure requires **Authorized IRS e-file Providers** to have security systems in place to prevent unauthorized access to taxpayer accounts and personal information by third parties. It also specifies that violations of the GLB Act and the implementing rules and regulations promulgated by the FTC, as well as violations of the non-disclosure rules contained in IRC sections 6713 and 7216 are considered violations of Revenue Procedure 2005-60, and are subject to sanctions specified in the Revenue Procedure. Internal Revenue Procedure 2005-60 is available at [www.irs.gov](http://www.irs.gov).

#### TYPE: State/Privacy and Security

**SUMMARY:** *State Laws* – Many state laws govern or relate to the privacy and security of financial data, which includes taxpayer data. They extend rights and remedies to consumers by requiring individuals and businesses that offer financial services to safeguard nonpublic personal information. For more information on state laws that your business must follow, consult state laws and regulations.

# Standards and Best Practices

Federal and state governments as well as private industry provide many information security standards and best practice guidelines to safeguard consumer information such as personal tax data. The National Institute of Standards and Technology (NIST) provides security guidelines and practices for federal agencies that nongovernmental organizations may also use. Below is a list of references on a variety of information safeguard topics that can help you understand and comply with laws, regulations, and best practices that may apply to your business.

# Glossary

**Adware** Computer advertising software that may or may not monitor computer use to target ads.

**Authorized IRS e-file Provider** A business authorized by the IRS to participate in IRS e-file as an Electronic Return Originator, an Intermediate Service Provider, a Reporting Agent, a Software Developer, an Online Provider, or a Transmitter.

**Confidentiality** Restrictions placed on information access and disclosure, including means for protecting personal privacy and proprietary information.

**Denial of Service** An attack that prevents or impairs the authorized use of networks, systems, or applications by exhausting resources.

**Electronic Return Originator (ERO)** Authorized IRS e-file Provider that originates the electronic submission of returns to the IRS.

**Encrypt** To convert plain text to unintelligible text using a cryptographic algorithm.

**Identity Theft** Misuse of someone else's personal information to obtain new accounts or loans or commit other crimes.

**Information Resources** Information and related resources, such as staffing, funding, and information technology.

**Information Security** The process that ensures the protection of information and information systems from unauthorized access, use, disclosure, disruption, modification, or destruction.

**Information System** A set of information resources designated for the organization of data for the collection, processing, maintenance, use, sharing, dissemination, or disposition of information.

**Information Technology** Equipment, system, or subsystem of equipment that is used in the handling of data. Information technology includes computers, ancillary equipment, software, firmware, and similar procedures, services (including support services), and related resources.

**Integrity** The authenticity or unimpaired condition of information; including reliability for non-repudiation of origin.

**Intermediate Service Provider** An Intermediate Service Provider receives tax returns from EROs (or from a taxpayer or tax exempt organization that files electronically using a personal computer, modem or the Internet, and commercial tax preparation software), processes the return information, and either forwards the information to a Transmitter, or sends the information back to the ERO (or the taxpayer or exempt organization).

**Intrusion Detection** The act of detecting actions that attempt to compromise the confidentiality, integrity, or availability of a resource.

**IRS e-file** The brand name of the electronic filing method established by the IRS.

**Management Safeguards** The security safeguards or countermeasures for an information system that focus on the management of risk and the management of information system security.

**Non-repudiation** The process in which there is assurance that the sender of information is provided with proof of delivery and the recipient is provided with proof of the sender's identity for future validation purposes.

**Online Provider** An Online Provider allows taxpayers to self-prepare returns by entering return data directly into commercially available software, software downloaded from an Internet site and prepared off-line, or through an online Internet site.

**Operational Safeguards** Security for an information system that is primarily implemented and executed by people rather than by a system.

**Reporting Agent** Provider that prepares and originates the electronic submission of employment tax returns for its clients. A reporting agent is an accounting service, franchiser, bank, service bureau, or other entity that complies with Revenue Procedure 2003-69, 2003-2 C. B. 403, and is authorized to perform one or more of the acts listed in Revenue Procedure 2003-69 on behalf of a taxpayer.

**Risk** The likelihood that the unwanted impact of an incident will be realized.

**Risk Assessment** The process of identifying risks and determining the probability of occurrence, the resulting impact, and additional security controls that would mitigate this impact.

**Risk Management** The process of managing risks through risk assessment; cost-benefit analysis; the selection, implementation, and assessment of security controls; and the formal authorization to operate the system. The process includes consideration of effectiveness, efficiency, and constraints due to laws, directives, policies, or regulations.

**Safeguard** Protective measures prescribed to meet the security requirements specified for an information system. Safeguards may include security features, management constraints, personnel security, and security of physical structures, areas, and devices.

**Security Controls** Safeguards designed to protect the confidentiality, integrity, and availability of a system and its information.

**Security Plan** Formal document that provides an overview of the security requirements for the information system and describes the security controls in place or planned for meeting those requirements.

**Security Requirements** Requirements that are derived from laws, policies, instructions, regulations, or business (mission) needs to ensure the confidentiality, integrity, and availability of the information being processed, stored, or transmitted.

**Service Provider** Any individual or business that maintains, processes, or is given access to customer information through the provisions of a service agreement with another individual or business.

**Software Developer** Software Developers develop software for the purposes of (a) formatting electronic return information according to publications issued by the IRS and participating states that set forth electronic return file specifications and record layouts for tax returns; and/or (b) transmitting electronic tax return information directly to the IRS.

**Spyware** Software installed into an information system to gather information on individuals or organizations without their knowledge.

**Tax Preparer** Any person who is engaged in the business of preparing or assisting in preparing tax returns.

**Technical Safeguards** Controls for a system that are primarily implemented and executed by the information system through mechanisms contained in the hardware, software, or firmware components of the system.

**Threat** Any circumstance or event with the potential to adversely impact operations, assets, or individuals through an information system via unauthorized access, destruction, disclosure, modification of information, and/or denial of service.

**Transmitter** A Transmitter will send the electronic return data directly to the IRS. EROs and Reporting Agents may apply to be Transmitters and transmit return data themselves, or they may contract with accepted Third-Party Transmitters that will transmit the data for them. A Transmitter must have software and computers that allow it to interface with the IRS.

**Trojan Horse** A computer program used to attack a computer system by secretly allowing, among other things, unauthorized access or alteration of data or software.

**User** Individual or system process authorized to access an information system.

**Virus** A computer program used to compromise a computer system by performing functions that may be destructive. A virus may alter other programs to include a copy of itself and execute when the host program or other executable component is executed.

**Vulnerability** Weakness in a system through procedures, internal controls, or implementation that could be exploited or triggered by a threat source.

**Worm** A computer program used to compromise a computer system by impacting performance. A worm can travel from computer to computer across network connections replicating itself.
